Create Everyday Styles

CORNROW™ EXPRESS CAP

PATENT PENDING

"History Making Miracle Cap!"

C.E. Fitting

LONG HAIR

- For the best fit, we recommend that you plait your hair into a circle. This will create a flatter and more natural-looking fit.

SHORT HAIR or SENSITIVE SCALP

- If you have short hair or a sensitive scalp, it is best to make a couple of braids with your own hair. This will create a secure fit and will serve as the foundation when sewing the cap to your hair. When your hair grows you can simply cut the threading off the Cornrow Express cap and re-braid your hair.

CLOSURE

- You can either apply a center or part closure for the finished style. The Cornrow Express cap has the option to complete your style without a closure. Simply cut a small area of the cap and pull your hair through the cap, this will create a natural look.

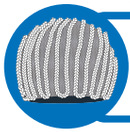
FOR PARTIAL USAGE

- If you do not want to use the whole cap you have the choice to use only a portion. Measure the area that is missing hair and cut the cornrow cap to match the size of the area. Now sew-in the cap to your existing cornrows and either sew-in or glue-in your style to the cap.

C.E. Cap Types

Horseshoe Cap

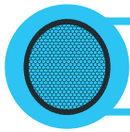
- Intended use is for parted hairstyles
- Best with middle and side parts



Straight Back Cap

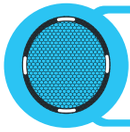
- Used for straight, swoop or swept bangs
- Should be used with a full head weave and a circle top closure

C.E. Cap Construction



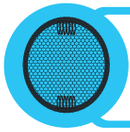
Regular Cap

- Removable and reusable cap for weaves.
- Best results with middle to long hair.



Silicon Based for Hairless Users

- Used with only the silicon base for everyday use
- Double-sided tape can be applied to the silicon base to ensure a secure fit.



Cap with Front & Back Combs

- The comb can help prevent the cap from moving or sliding off your head.
- It can be used in other areas for a secure fit

Cap with Lace Part

- Can create various natural styles and have a choice in the part location. (No closure is needed for this cap)

VIVICA A. FOX HAIR COLLECTION

CORNROW™ EXPRESS CAP

Designed For

- Solution for Short Hair Problems
- Great for Any Type of Weaving Techniques of Your Choice
- Secure Fit – No sliding, Molds to Fit to Your Head
- Protects Natural Hair (Do not hurt your own hair anymore)
- Versatility in Styles - Create Everyday Styles

C.E. Technique

Crochet & Interlocking

- Straight Back cap pattern is recommended, when using your natural hair.
- You can use it for a styled wig to take on and off, or you can sew it around the edges to keep on.

Sew-In Weaves & Wig Units

- For sew-in, you need to sew down the cap all around completely until it is flat. Then start sewing the weaves on the cornrows.
- For Wig Units - Put a Cornrow Express cap on a mannequin head and glue or sew-in hair to it and style as desired.

Glue-In Cap Weaves

- For the glue-in technique, apply hair bonding glue to weave tracks, attach weaves to Cornrow Express cap, and style as desired.

C.E. Cap Size

Cornrow Express cap offers small, medium, and large cap sizes to fit everyone's head. Please refer to the chart below for the exact measurements.

CAP SIZES			
	S	M	L
Ear to Ear	13¼"	14"	15"
Front to Back	13¼"	14"	15"
Circumference	20½"	21½"	22½"

*We recommend when purchasing the *silicon based cap*, you buy it one size smaller than your actual size. This will help ensure a secure and natural looking fit.
